

The Characteristic Analysis and Enlightenment of Library Literature
Weeding Project in Foreign University Libraries

Wu Xiaoguang Zhang Zhikun

Nanjing University of Chinese Medicine Library, Nanjing 210046

Abstract: [Purpose/significance] Literature weeding is an important way for libraries to maintain collection vitality, expand collection space and realize diversified space reutilization. Analyzing and studying the practical methods and experiences of the weeding project in foreign university libraries is in order to provide reference and ideas for Chinese university libraries. [Method/process] The 15 cases presented in the column of OCLC “old experience” in the past five years (2013-2018) were selected as research objects. The characteristics and successful experience were summarized by analyzing the methods, personnel composition, process, objects and standards, visual field pattern, focus, harvest and the direction of weeded resources. [Result/conclusion] It is necessary for university library weeding to determine reasonable standards, processes and methods, scientific personnel arrangement and division of labor, keep constant communication with faculty and encourage the staff to fully participate in, give full consideration to all kinds of vehicle types of resources, pay attention to resources coordination and sharing, and we can consider to set up weeded resources processing channel and establish a normal collection evaluation system.
